## CAMBRIDGE INSTITUTE FOR INFORMATION SYSTEMS

The Cambridge Institute works with organization managers to link computers into a single, easy-to-use system. The Institute is a management consulting firm, specializing in applying computer technology toward fulfillment of an organization's goals.

The Institute's client list includes many Fortune 500 corporations, government, and other organizations. Currently, 140 employees work at the Institute under the direction of founder and CEO John Donovan, Ph.D. Dr. Donovan has been an assistant clinical professor at Tufts Medical School and a director of Tufts Birth Defects Center. He is a member of the Executive Advisory Board at Georgetown Medical Center. He is on leave from the faculty of the Massachusetts Institute of Technology Sloan School of Management.
